

SUNIL KUMAR PANDEY

📞: +91- 8196862020 ✉: sunil.sonu112@gmail.com

SENIOR BLOCKCHAIN DEVELOPER

- Experienced Blockchain Developer with 8+ years of comprehensive expertise in developing, implementing, and optimizing blockchain solutions.
- Proficient in various blockchain platforms, including Ethereum, Hyperledger, and Canton, adept at smart contract development, consensus algorithms, and decentralized application (DApp) design.
- Skilled in utilizing programming languages such as Solidity, JAVA and DAML to build efficient, secure, and scalable blockchain applications.
- Proven track record of collaborating with cross-functional teams to deliver innovative solutions tailored to meet clients' needs.
- Passionate about staying abreast of emerging technologies and trends in the blockchain space to drive continuous improvement and stay ahead of the curve.

AREAS OF IMPACT

Blockchain Development	Smart Contract Development	Decentralized Applications	Ethereum Hyperledger Canton	Kubernetes Devops	Java Solidity DAML
Consensus Algorithms	Cross-functional Collaboration	SCRUM Agile Methodologies	Client Collaboration	Development and Integration	Project Management

PROFESSIONAL EXPERIENCE

Since Aug'25 as Sr Blockchain Developer at LLOYDS Banking Group

Tools & Technologies: CANTON, DAML, Splice, Devops,

- Create and deploy smart contracts tailored for decentralized applications using Hyperledger blockchain technology.
- Designed and implemented tokenized deposit and Money Market Fund (MMF) bond workflows on distributed ledger platforms.
- Built and maintained DAML smart contracts for asset issuance, settlement, ownership transfer, and lifecycle management.
- Worked on digital wallet creation, account onboarding, custody integration, and funding mechanisms for tokenized assets.
- Implemented end-to-end trading workflows including trade capture, settlement, reconciliation, and asset transfers.
- Integrated blockchain platforms with enterprise banking systems and external APIs for payment, funding, and reporting operations.
- Mentored junior developers and contributed to blockchain capability building within the engineering team.

Apr'24- July'25 as a Blockchain Developer at IBM

Tools & Technologies: Hyperledger, Ethereum, Kubernetes, Devops, Java, Golang

- Create and deploy smart contracts tailored for decentralized applications using Hyperledger blockchain technology.
- Implement automated testing protocols to ensure the reliability and functionality of smart contracts.
- Deploys and maintains the network infrastructure, including peers, orderers, and channels.
- Monitors and ensures compliance with regulatory requirements within the Hyperledger Fabric network.
- Stay updated on the latest developments in blockchain technology and incorporate new features and capabilities into smart contract design and deployment.

Jan'22-Mar'24 as Software Engineer and Technical Lead at Wipro Limited

Honda NA | Manufacturing Industry (US Client)

Tools & Technologies: Blockchain, System Design, Ethereum, Corda, Hyperledger, GenAI, DevOps, Solidity, Java.

- Led the conceptualization and execution of distributed blockchain-based enterprise solutions catering to the needs of five stakeholders.
- Collaborated closely with cross-functional teams to guarantee the seamless integration and deployment of blockchain solutions.
- Architected, programmed, and launched smart contracts and decentralized applications (dApps) on both public and private blockchain networks.
- Implemented strategies to identify cost-saving opportunities while upholding the efficiency and security of IT operations.
- Developed an automated usage tracker to monitor screen usage by stakeholders, resulting in a significant reduction of manual efforts by 60%.

Dec'18-Jan'22 as System Engineer at Tata Consultancy

EBurst | SBI Payments Card | Cigna || Dec 2018 - Jan 2022

Tools & Technologies: Ethereum, Blockchain, Eclipse, SoapUI, OpenShift, JIRA, Confluence, Java, Springboot, Devops.

- Conceived and managed web applications utilizing Java, Spring Boot, Hibernate, and Blockchain technologies.
- Implemented a Comparison Tool for automating response comparisons, resulting in a remarkable efficiency boost of 60%.
- Enhanced the Compass Tool to automate data generation processes, leading to a notable 30% increase in transaction speed.
- Contributed to the development of diverse message flows within the team.
- Engaged actively in design sessions, walk-throughs, code reviews, and defect review meetings to uphold software quality and maintainability standards.
- Implemented automation of the Excel report generation process through Java and SQL, resulting in a notable 50% reduction in efforts.
- Formulated and executed comprehensive unit and integration tests to guarantee the high quality of the software.
- Established and enforced standards and protocols to facilitate components and services within an agile environment.
- Developed automation scripts using SoapUI, resulting in a substantial 60% reduction in efforts.

INITIAL EXPERIENCE

Feb'18-Sep'18 as Software Developer at Logic ERP Solutions

Gini & Jony | Fashion Industry

Tools & Technologies: Dotnet, SQL, HTML, Bootstrap, Javascript, Visual Studio

ACADEMICS & CREDENTIALS

Masters in Computer Application from Lovely Professional University, Punjab in 2018
Bachelors in Computer Application from United Institute of Management, Allahabad in 2016

ACHIEVEMENTS

INFOSYS: Blockchain 101
UDEMY: Blockchain with Industry Applications
UDEMY: Master Ethereum & Solidity Programming
WIPRO: Round of Applause & Inspiring Performance Award
TCS: Applause for Team & On the Spot Award
LPU: Academic Honour Award

PERSONAL DETAILS

Date of Birth: 01-12-1993 | **Languages Known:** English & Hindi
Address: Hyderabad, India
